

Side by Side – Marcia and Lisa's 2011 Discoveries

December 24, 2011

For our final Side by Side for 2011 we've decided to each pick 5 discoveries: items we never knew about or had any familiarity with that turned out to rock our world. In early 2012 we'll be back with new Top Ten lists but for now check out to see what got Marcia and Lisa most excited about in 2011.

Marcia's Discoveries:

1) **Somme Institute skincare**: This is a brand that I never even had heard of in spite of its prominence at Nordstrom and spas. I have reviewed a lot of skincare in 2011 and will continue to do so but the one brand that I've used the longest and am still using while testing others is Somme. The line is simple, clean, fragrance free and effective. I especially love the three steps of Transport (exfoliation), Serum and A-Plus (vitamin enriched moisturizer). I've also been using the Eye Cream and Boost the warming mask which will be reviewed in January. All 7 items have made a difference in the condition of my skin and are highly recommended by me.

Somme Institute 5 step system
